

Usability Evaluation Report

Project: ClassIQ

Name: Kumudu Nallaperuma

No	Heuristic	Description of the Issue	Screenshot	Severity	Suggested Improvement
1	H1-1: Simple & natural dialog	Home screen has too much decorative background which distracts users from main actions		2	Simplify background and highlight primary buttons
2	H1-2: Speak the users' language	Some labels are unclear		2	Use clear, consistent terms
3	H1-3: Minimize users' memory load	Teachers must remember grading rules instead of seeing them while entering marks		3	Display grading scale beside mark entry table.
4	H1-4: Consistency	Back button flickers when hovering near its edges		2	Fix hover behaviour by stabilizing button size and position
5	H1-5: Feedback	System provides weak visual feedback when selecting a student, making user actions unclear		2	Improve selection feedback using colour contrast, hover effects, or selection icons.
6	H1-6: Clearly marked exits	"Back" and "Logout" buttons are small and not prominent; risk of confusion.		2	Make navigation buttons larger
7	H1-7: Shortcuts	shortcuts (e.g., keyboard navigation, auto-suggestions,) are missing		1	Add live search, keyboard navigation

8	H1-8: Precise & constructive error messages	error message is not very prominent		2	Improve visibility
9	H1-9: Prevent errors	system displays “0” for marks that have not been entered, which may lead teachers to assume marks are already recorded		3	Use empty fields, “—”, or “Not Entered” instead of “0”
10	H1-10: Help and documentation	Help page, Privacy Policy are placed in the footer with low visibility		1	Make the Help option more prominent
