

Bug and issue report

Bug ID	Related Test Case	Issue Description	Steps to Reproduce	Expected Result	Actual Result	Severity	Priority	Status	Assigned To	Final Comment
BUG-01	Language selection clarity	Language selection control is not very noticeable on the home screen.	Open the home page and try to identify how to change the language.	The language option should be easy to find and understand.	The option is available but not visually prominent.	Low	Low	Open	Team	Increase visibility using clearer label or placement.
BUG-02	Valid student login	Invalid student login attempt gives unclear feedback.	Open Student Login → enter wrong username/password → click Login.	The system should show a clear invalid-login message.	The user cannot easily understand whether the username or password is wrong.	Medium	Medium	Fixed	Team	Show a simple message such as including which is exactly wrong.
BUG-03	Save subject marks	Negative values can be entered in mark fields.	Login as teacher → open marksheet → enter -10 in a mark field → click Save.	The system should reject negative marks and show an error.	The negative mark is accepted or not clearly rejected.	High	High	Fixed	Team	Marks should only allow values from 0 to the maximum allowed score for each section.
BUG-04	Save subject marks	Marks above the maximum allowed value can be entered.	Login as teacher → enter 120 for final exam → click Save.	The system should block marks greater than the allowed limit.	The value is accepted or no clear error is displayed.	High	High	Fixed	Team	Add upper-bound validation before saving marks.
BUG-05	Save subject marks	Unentered marks appear as 0, which can mislead teachers.	Open teacher marksheet with students who have no recorded marks.	Blank marks should appear as empty or 'Not Entered'.	The table displays 0 for missing marks.	Medium	Medium	Open	Team	Displaying 0 may make teachers think marks were already entered.
BUG-06	Save feedback	Feedback save confirmation is not strong enough.	Login as teacher → open student details → type feedback → click Save.	A clear success message should confirm that feedback was saved.	The user is not fully sure whether the feedback was saved.	Medium	Medium	In Progress	Team	Use a visible success alert or status label.
BUG-07	Export report card PDF	PDF export does not clearly show where the file was saved.	Login as student → open report card → click Export PDF.	The system should export the PDF and show a confirmation with the saved location.	The export may complete, but the save location is unclear.	Medium	Medium	Fixed	Team	Add a confirmation message with filename/path.

BUG-08	Dynamic UI language switching	Some UI labels stay in English after changing the language.	Select Sinhala or Arabic → navigate through dashboard and report pages.	All visible labels should change to the selected language.	Some buttons or labels remain in English.	Medium	Medium	In Progress	Team	Check missing translations in resource files and database translations.
BUG-09	Arabic RTL readability	Arabic interface is not fully right-to-left in some pages.	Select Arabic → open dashboard, marks page, and report card.	Arabic text and layout should align right-to-left consistently.	Some sections remain left-aligned or look inconsistent.	Medium	High	Fixed	Team	Review RTL alignment for tables, navigation, and buttons.
BUG-10	Input validation reliability	Non-numeric mark input is not handled clearly.	Open marksheet → type letters such as 'abc' in a mark field → click Save.	The system should reject non-numeric input and show a clear error.	The field behavior is unclear.	High	High	Open	Team	Use numeric-only validation and readable error messages.
